**Warning! Working at height, rock climbing, mountaineering and related activities are intrinsically dangerous. It is the responsibility of any person using this equipment to learn and practice the proper techniques and use of the equipment for its designated purposes safely and to foresee and take appropriate action in situations where rescue may be required. Even when the correct use of equipment and techniques may result in fatal consequences. Serious conditions can affect the safety of the user in normal and emergency use. Any person using this equipment assumes all risks and full responsibility for all damages or injury which may result from the use of it. It is impossible to cover all the risks. ALWAYS WEAR YOUR SAFETY GEAR AND PICTOGRAMS SHOW SOME OF THE COMMON CORRECT OR INCORRECT METHODS OF USE. IT IS IMPOSSIBLE TO PREDICT THEM ALL. THERE IS NO SUBSTITUTE FOR INSTRUCTION BY A TRAINED AND EXPERIENCED INSTRUCTOR.**

**USER INSTRUCTIONS**  
**IMPORTANT! Please read and understand this information before use, and retain this information for future reference.**

**General Information**  
1. These instructions cover the use of DMM Ice Axes, Deadman, Bulldog and Terrier conforming to one or more international standards. If in doubt please contact your supplier or DMM.  
2. This equipment is to be used in conjunction with any appropriate item of Personal Protective Equipment (PPE) relevant to European Union Directive 89/686/EEC / PPE Regulation (EU) 2016/425. It is not acceptable for use in other applications, please consult your supplier. **RISK:** This PPE is designed to protect against falls from height. 3. Immediately before use, visually/functionally inspect to ensure that this product is in a serviceable condition and operates correctly. This inspection should be recorded on the inspection form supplied. We recommend a thorough inspection at least once every 6 months by a competent person (this may be the manufacturer).  
4. **Personal Issue:** This product may be issued for personal use, and may be used either separately or as part of a system. The user should be aware of its history, usage, maintenance and inspection. If this equipment is not for personal use (e.g. used in mounting a tent), we strongly recommend a systematic approach to record keeping. This should include a record of the following:  
**6. WARNING:** If you are in any doubt about the safe condition of this product, replace it immediately.  
7. Ensure that the instructions for other components used in conjunction with this product are complied with. It is the user's responsibility to ensure that he/she understands the correct safe use of this product.  
8. This product is designed for use in normal climatic conditions (-40°C - +50°C). It may be suitable for other conditions, please consult your supplier.  
9. This product is designed for use in normal climatic conditions (-40°C - +50°C). It may be suitable for other conditions, please consult your supplier.  
10. No special transportation precautions are necessary, however, avoid all contact with sharp edges or corners. Do not use this product on sharp edges or corners.  
11. Care must be taken to avoid loading this product over edges and other obstructions. Check the anticipated orientation during loading before use.  
12. **Anchor:**  
12.1 Positioning of the anchor point is crucial for safe fall arrest and this must take into account the strength of the anchor, the type of anchor, the method of deployment of the shock absorption system (where used) and the length of the connector so that obstructions such as the ground) may be safely avoided.  
12.2 **Bergsteiger:** The user is advised that the user should be aware of ice or (or any combination of them) anchor point (belly) natural or unnatural cannot be guaranteed as safe and therefore good judgment by the user is a necessity in order to obtain adequate protection.  
13. **Snow and Ice Climbing: General Information**  
13.1 **IMPORTANT:** We strongly recommend the user practices climbing and placement techniques in a controlled and safe environment before using these products in mountaineering situations.  
13.2 The correct use of this product for protection is a complex skill which is learnt through experience. If in doubt seek advice from a trained competent person.  
13.3 Snow and ice are changeable mediums. It is impossible to guarantee the consistency of any equipment used in snow and ice.  
13.4 The safety of any ice or snow anchor must be treated with extreme caution. This tool is not suitable for use in snow and/or ice unless specifically designed for this purpose (e.g. rock pitons, ice screws etc.). The security of this type of anchor is completely dependent on the ability of the snow and/or ice to hold the ice tool anchor in place in the event of a chute. See reporter également aux consignes spécifiques relatives à ce produit et aux illustrations qui suivent.  
14.4. Choisir l'endroit de pose du Deadman de la manière illustrée.  
14.5. De la neige dure consolidée (nevi) procure une haute sécurité par rapport à la neige molle non consolidée, qui peut ne pas apporter la moindre protection en cas de chute.  
14.6. De la neige peu profonde, et des pierres ou d'autres obstructions sur la neige, peuvent nuire à la sécurité de la pose.  
14.7. Découper une marche commode/ligne.  
14.8. Tailler une fente verticale pour le câble du Deadman descendre de la pente en ligne droite.  
14.9. Le Deadman au marteau dans l'arrière de la marche, à un angle de 40° par rapport à la pente de neige.  
14.10. Tré-charger soigneusement le Deadman pour s'assurer qu'il tient bien au point de protection à sa disposition (ice, rock pitons, ice screws etc.). The security of this type of anchor is completely dependent on the ability of the snow under the forces that may generally be expected to occur at the high level of security.  
14.11. **Specific User Information (Deadman) See diagrams**  
14.1 **WARNING:** A knowledge of local avalanche conditions and snow slope is essential for safe use.  
14.2 The security of the Deadman anchor is completely dependent on the type and nature of the snow it is placed in, the correct placement and orientation of the Deadman, and the skill and experience of the user.  
14.3 **WARNING:** The security of any snow (or ice) anchor must be treated with extreme caution. This tool is not suitable for use in snow and/or ice unless specifically designed for this purpose (e.g. rock pitons, ice screws etc.). The security of this type of anchor is completely dependent on the ability of the snow under the forces that may generally be expected to occur at the high level of security.  
14.4 Select the placement site for the Deadman as shown in the pictograms:  
14.5. The Deadman Grip Tape para personalizar y mantener el mango.  
14.6. De la neige peu profonde, et des pierres ou d'autres obstructions sur la neige, peuvent nuire à la sécurité de la pose.  
14.7. Découper une marche commode/ligne.  
14.8. Tailler une fente verticale pour le câble du Deadman descendre de la pente en ligne droite.  
14.9. Le Deadman au marteau dans l'arrière de la marche, à un angle de 40° par rapport à la pente de neige.  
14.10. Tré-charger soigneusement le Deadman pour s'assurer qu'il tient bien au point de protection à sa disposition (ice, rock pitons, ice screws etc.). The security of this type of anchor is completely dependent on the ability of the snow under the forces that may generally be expected to occur at the high level of security.  
14.11. **Specific User Information (Bulldog and Terrier) See diagrams**  
15.1 The Bulldog/Terrier not furnished with the degree of security required for main fall arrest.  
15.2 The Bulldog/Terrier is designed as a fast but marginal method of protection and should only be used when no other method of protection is available or possible.  
15.3 **Maintenance and Servicing:** This product must not be marked, modified or repaired by the user unless authorised by DMM. Note: this product is not user maintainable with the exception of the following:  
15.4 **Disinfecting and Cleaning:** Disinfect with clean domestic grade water with liquid soap in the pH range 5.5 to 8.5 for 15 minutes. Rinse in clean water and dry naturally in a warm ventilated room away from direct heat. It may be possible to repair by Utilisateur sauf autorisation de DMM. Remarque: l'entretien de ce produit n'est pas réalisable par l'utilisateur à l'exception de ce qui suit.  
15.5 **Specific User Information (Bulldog and Terrier) See diagrams**  
15.1 The Bulldog/Terrier not furnished with the degree of security required for main fall arrest.  
15.2 The Bulldog/Terrier is designed as a fast but marginal method of protection and should only be used when no other method of protection is available or possible.
