EN:
Warning! Working at height, rock climbing, mountaineering and related activities are inherently dangerous. It is the responsibility of any person using this equipment to ensure that it is used safely and in accordance with the appropriate action in its designated uses. Rescue may be required. Even the correct use of equipment and techniques may result in fatal consequences. Read and understand this information before use, and retain this information for future reference.
General Information:
 1. These instructions cover the use of DMM Rigging Hubs and Plates, conforming to or more international standards. If in doubt please contact your supplier or DMM.
 2. This product may be used in conjunction with any appropriate item of Personal Protective Equipment (PPE) relevant to European Union Directive 89/686/EEC & PPE Regulation (EU) 2016/425. It may be acceptable for use in other applications, please consult your supplier.
RISK: This PPE is designed to protect against falls from height.
 3. Immediately before use, visually/functionally inspect to ensure that this equipment is in good condition and that the inspection record is completed and recorded on the inspection form supplied. We recommend a thorough inspection at least once every 6 months by a competent person. This may be the manufacturer.
IMPORTANT: Read and understand this information before use, and retain this information for future reference.
